

Integrating with today's systems to produce tomorrow's results...

Salve® Workforce Wellness Screening

Using ARPS™ Technology

Salve, Latin for “in good health”, describes our mission at Allostatix perfectly...We help you improve your population’s health and take charge of your health/wellness benefit decisions by providing you with the most accurate, predictive health risk tool in existence today.

Cardiovascular/Metabolic Screening

Provides breakdown and health status of two (2) body systems: Cardiovascular and Metabolic, specifically the likelihood of developing heart disease and diabetes.

Prediction Accuracy of Health Outcomes: 70-77%, 3-5 years in advance of symptoms

Health data required to run this screening:

- First/Last Name or Unique ID
- Height
- Gender
- Age
- Health History
- Waist Circumference
- Heart Rate
- Blood Pressure
- Triglycerides
- Glucose
- Total Cholesterol, HDL Cholesterol & LDL Cholesterol

Whole Body Health Screening (Optional)

Provides enhanced breakdown and health status of (6) body systems: Cardiovascular, Metabolic, Pulmonary, Renal, Immune/Inflammatory, and Adrenal.

Prediction Accuracy of Health Outcomes*: 90%, 3-5 in advance of symptoms

*Age Dependent

Health data from cardio/metabolic level + these additional blood/biometrics:

- Creatinine
- DHEA-S
- Hemoglobin A1C
- Fibrinogen
- Albumin
- Homocysteine
- Interleukin-6
- C-Reactive Protein
- Peak Flow
